Anti-Aging Secret 300% More Powerful than Resveratrol?

This antioxidant is proving to be a stronger anti-aging solution, better at fighting free radicals, and more potent in helping keep your brain healthy and sharp.

It could have you feeling—and looking—younger than anything you’ve heard of before.

Dear Reader,

Scientists have called resveratrol a “miracle molecule.”

A 60 Minutes segment on the compound reported, “If [scientists] are right, we all may soon be taking a pill that could add a decade or two of healthy old age.”

As head of one of the world’s leading natural health resources, we’ve done our due diligence. And we can confirm that resveratrol is, indeed, an amazing nutrient.

But while doing our research, we turned up something else. Something much, much better...

It’s a tiny compound found in the skin of some fruits. This antioxidant is so powerful that one of America’s most trusted experts recently declared on national television, “It’ll help you live longer.”

In early studies, it appears that anything resveratrol may help do—keep cells healthy...blood flow easily...support healthy blood sugar...and keep mental function clear and sharp—this overlooked compound does even better.

Think of it as Resveratrol 2.0.

One recent study took a closer look. The researchers found it worked better than resveratrol in animals in keeping brains healthy and supporting memory. They concluded that this antioxidant is—and I quote—“more potent” when it comes to keeping the brain young.

And yet another animal study out of Taiwan showed it was better than resveratrol at supporting colon health.
Here’s the thing...

According to experts, this compound can break through the blood/brain barrier as well as get into your cells. That means it may be better at supporting brain and heart health, and also keeping your skin young and healthy.

Plus, it absorbs into the blood four times better than resveratrol. That means 300% more of this compound gets to work its magic.

But of course the wheels of science turn slowly. That’s why you have yet to hear about this age-defying natural solution on 60 Minutes. But it is well on its way to proving itself as yet another powerhouse antioxidant—perhaps double or triple the power of resveratrol. Maybe even more.

Emerging evidence from in vitro and animal research suggests that it:

- Reduces free-radical damage and protects your cells.
- Helps keep your heart young and healthy.
- Supports healthy cholesterol levels naturally.

And that’s not all. Combined with other science-backed nutrients, this wonder compound could help you:

- Wake up vibrant every day.
- Have boundless energy that carries you throughout the entire day—no caffeine needed.
- Be more productive and finish each day feeling satisfied with your accomplishments.
- Feel more positive, reeling with good energy.
- Know that with every step you take, your body's inner defenses are hard at work keeping you healthy.

And speaking of those “other” nutrients, here’s where it gets really interesting...

**More Powerful than Resveratrol or This “New” Compound...**

Remember how I said this compound is proving better than resveratrol? It is. But there’s a way to really ramp up its potency...

And that’s by combining it *with* resveratrol!

The antioxidant is called pterostilbene. We’ll call it PT for short. It’s actually a close relative of resveratrol, just with a slightly different molecular structure.
And when you put this power duo together, in vitro research suggests that they may protect your cells better from free radical damage than either one alone.

We all know what kind of havoc free-radicals can wreak on your health. Not to mention they may accelerate aging, cause wrinkles, gray hair—or worse, baldness, DNA damage, and a host of other issues. In other words, free radicals may be to blame for most of the unpleasant side effects of growing older.

That’s why I, for one, am going to fight it every step of the way. Starting with the right antioxidants...

“I am 68 years old and have the energy of someone half my age.” – Mitchell A.

Of course I wouldn’t be surprised if scientists and doctors take years to conduct more research and look at data. But you can start using this discovery to improve your life today.

That’s right – by the time the mainstream catches on, you’ll already be helping your heart, supporting your brain, and rejuvenating your body cell by cell.

More on resveratrol and PT and how they can help keep you young, healthy and vibrant in a moment ...
But first, I want you to know that this this “miracle combo” is available right now in one of the most effective formulas science has created. And they’re only part of it.

I’m talking about a special elixir that combines these nutrients with fifteen other ingredients – all chosen to give you the vibrant health you deserve.

Hundreds of lucky men and women have already tried it...

Donna G reports:

"I started it approximately 2 months ago. I use it once per day and have an abundance of energy!"

"I have been taking [this] elixir for over a year I think. I take it every day in the morning. What I notice most is that it affects my bones and joints in a positive way. I also notice an increase of energy after drinking it. I think it is an excellent product and I would recommend it to anyone who wants good antioxidant protection in a great tasting drink." says Jeff C.
And then there’s Mitchell A. who says, “I have been taking [it] for a few months. I am 68 years old and have the energy of someone half my age. I feel much more alert, more active, and younger. Some of my friends don't believe my actual age."

**Forget the aches and pains of aging**

Instead of waking up with aches and pains... Feeling old age breathing down your neck... Slogging through work in a mental fog... And just trying to "get through" each day...

This elixir ensures that you wake up each morning to a day ripe with potential.

That's because the biochemists who developed the elixir formulated it to keep your body and mind at the peak of good health.

They designed it to offer you a whole host of mental and physical benefits, including...

- Supporting a healthy heart
- Vigorous energy
- A robust immune system
- Greater mental clarity
- Smooth, healthy skin
- A flawless memory

And so much more...

"**Bring me a health formula that blows everything else out of the water.**"

My name is Angela Salerno.

I head up a health research foundation known as The Institute for Natural Healing. Together with a group of medical doctors, researchers, and health enthusiasts, I publish cutting-edge information about the latest advancements in alternative health.

Our founder recently directed me to hunt down the most effective formulation for vibrant health.

He put it simply:

"I’ve seen what’s out there. And I’m disappointed with all of the options. I want to know I’m taking the very best product. I want to take what the top researchers take...what the world’s
most renowned doctors take... what they would give to their own mothers. I don’t want to work so hard just to stay young and feel good. So bring me a health formula that blows everything else out of the water."

Of course, I immediately dispatched our research team. After investigating, they came to the conclusion: *Nothing available to the general public was worth taking.*

But we didn’t give up. Instead, we used what we had learned to create our own cutting-edge health formulation.

We wanted it to adhere to strict guidelines. It had to be:

1. Made from high-quality, natural ingredients
2. Quick and easy to take
3. So delicious it felt like a treat – not a punishment
4. Packed with ingredients known to deliver real health benefits
5. Affordable to the general public
6. Better than anything on the market

I’m proud to say we were able to meet every one of our guidelines.

We named it **BioPT Elixir**.

It’s delicious, full of the most effective, all-natural ingredients available and packed with benefits you can feel. Plus, it’s quick and easy to take. Just mix one scoop of the formula into a 6-ounce glass of water or juice daily. And that’s it.

**Why just about every other “solution” out there is useless!**

But why does it work so well?

While our biochemists were researching the formula, they hit upon a massive breakthrough in the anti-aging field.

It’s simple. But it’s also revolutionary on a nutritional level.

You see, the body requires a certain *balance* to function properly. It is not that we need *more* of some nutrients and *less* of others. It is that we need certain basic nutrients, *together*, to get the maximum benefit from everything we eat. Makes sense, right?
Well, consider some of the changes the body can face when it ages. Problems regulating blood flow and processing sugar... difficulty with digestion ... changes in bone density... muscle fatigue and weakness...You'll find there are two specific nutrients that support every one of these functions in the body.

*The American Journal of Clinical Nutrition* declared that these two nutrients, along with certain fruits and vegetables, could help maintain bone density in the elderly... And that's just the beginning.

On the flip side, when we're low on either of these two key minerals, it has a definite effect on our health. They are *that* essential.

I'm talking about magnesium and potassium.

Magnesium is mostly stored in our bones, and some in our muscle. In fact, its beneficial effect on the body's biggest muscle, the heart, has been noted by researchers at Harvard and Oxford and was reported in the *New York Times* almost a decade ago.

Potassium is essential for the proper functioning of the heart, kidneys, muscles, nerves, and digestive system.

And once again, it’s the combination here that really matters. Some studies have indicated that there is an important inter-relationship between the two nutrients.

"Most Americans are not getting the RDA of magnesium. Low levels of magnesium in the diet and our bodies increase susceptibility to a variety of diseases..."

But by most standards, including the government recommended guidelines, many Americans don't get sufficient amounts of either – which can negatively affect your health. When you consider that these nutrients are essential for the proper function of nearly every organ system of the body, you can imagine the toll it must take on your body if you aren’t getting enough.

Without this basic foundation for healthy cells, you could pump all the revolutionary anti-aging nutrients in the world into your body, and they would just go to waste!

**The discovery that magnifies every anti-aging breakthrough of the last decade**
We realized that we could... for the first time... combine every single breakthrough from the last *decade* of anti-aging research. And then make sure to include both potassium *and* magnesium in the correct balance... to create a drink that would be more powerful than anything else.

So that's what we did.

Everything that's good for you gets magnified when you include the magnesium and potassium your cells need...

- **Antioxidants** that protect your cells... help keep your mind sharp... and your memory intact...are now put to maximum use.
- **Polyphenols** that help promote healthy levels of inflammation and keep blood flowing strong...can be magnified
- **Superfoods** that keep your immune system strong and healthy...work like a charm
- **Minerals** that strengthen bones, maintain muscle tone, and keep your heart naturally healthy...keep your body feeling younger and more energized

Simply put, aging as we know it has changed. And so should your approach to it!

That's why I want to introduce you to **Bio PT Elixir**... The six-ounce drink that can help you live at your maximum potential every day.

No need to eat more, drink more, or take a bunch of pills to take advantage of this revolutionary breakthrough. With Bio PT Elixir, you can *drink* to your health every morning.

And it's so delicious and refreshing, it ought to come with a little paper umbrella and be served poolside!

But besides its great taste...

And besides the one-two punch of magnesium and potassium...

Let me show you what *else* we packed into Bio PT Elixir to create such a powerful approach to anti-aging...

**The personal BODYGUARD for every one of your cells**

By now, I’m sure you’ve heard the good news about antioxidants.
Antioxidants shield your cells from free radicals. As a result, your health, vitality, memory, and appearance all come out on top. Since our bodies are nothing more than a collection of cells – healthier cells mean a healthier you!

And I'm not just talking about feeling good, or simply having more pep in your step – although antioxidants can help with that, too.

I'm talking about cellular protection. So your entire system can better resist the deterioration brought on by free radicals and oxidative damage to the cells – naturally.

But not all antioxidants are alike.

Some are more powerful than others. Some seem to target specific functions in the body. Like improving night vision... enhancing mental function and memory... maintaining healthy blood pressure and glucose levels... even fighting the inflammation that most active people face from time to time.

But we also made another surprising discovery. We found the highest concentrations – and most diverse types – of antioxidants...

In berries!

We used to think of berries as a colorful addition to cereal, or a refreshing juice., But research now reveals they are a powerhouse of prevention in a super-tiny package.

The trick was to figure out how to use it to its maximum advantage for optimal health.

That's where Bio PT Elixir comes in.

**Our proprietary blend of all-natural health boosters**

We've taken full advantage of the research-to-date on antioxidants, what they do for your body, and where you can find them – and put the most powerful combination into this revolutionary anti-aging blend.

Because, as delicious as they are, you'd be hard-pressed to get all of them, at the right concentration to deliver the highest possible level of cellular protection, without stuffing yourself with nothing but berries all day long!
Of course with Bio PT Elixir, you don't have to worry about that.

Let me show you the list of potent berry extracts you'll find in this exclusive formula:

<table>

</tbody>
</table>

As far as "garden variety" berries go, this is an impressive list. But we didn't stop there.

Our goal was for one six-ounce drink in the morning to replace a handful of supplements – and possibly cartons of expensive juices and berries every week.

So, of course, we had to also include...

**Health secrets from around the globe**

All over the world, different cultures have known about one miracle food or another. Now we can bring those foods together into one powerful age-defying package.
Such as…

- The goji berry, from the valleys of Tibet and Mongolia. People there have long cherished this tiny fruit. They believed it was the secret ingredient to their longevity…And the proof is in the census records. In the Ninxia region of Northern China, where the goji berry is native, there are 16 times more people over 100 years-old than in the rest of the country!

- And in South and Central America, they swear by the acai berry for beauty and encouraging easy flow through veins and arteries.

These are not berries you'll find by the roadside – or even in your supermarket. But you will find them in Bio PT Elixir.

And of course, we couldn't leave out the two anti-aging agents that have been widely studied and reported in health-conscious circles…

- Green tea, which may help improve cholesterol levels.

- Red wine – thought to be behind the French Paradox – that mystifying phenomenon where a culture that enjoys a high-fat, high-cholesterol diet live long and healthy lives!

Both are high in polyphenols – antioxidants that emerging evidence shows may:

- Support a healthy immune system
- Promote a healthy inflammatory response
- Enhance cell-to-cell communication
- Promote healthy estrogen metabolism
- Convert beta-carotene into vitamin A
- Protect against DNA damage caused by smoking and other toxic exposures

And don’t forget about the two powerhouse antioxidants I mentioned earlier…

Resveratrol has been as promising in the lab as red wine has been to the French for generations. Studies indicate that it keeps circulation and blood flow at optimal levels.

And remember, PT is proving to be even more powerful.

Blueberries have the highest concentration of this compound.

"Acai is naturally low in sugar, and the flavor is described as a mixture of red wine and chocolate, so what more would you want from a fruit?"

– Dr. Susanne Talcott, lead researcher, Texas A&M University's nutrition and food science department
"The therapeutic potential of red wine has been bottled up for thousands of years, and now that scientists have uncorked its secrets, they find that studies of how resveratrol works can lead to new treatments."

- Gerald Weissmann, M.D., Editor-in-Chief, The FASEB Journal

In fact, they outranked 40 other fruits and vegetables for overall antioxidant activity in a USDA study at the Human Nutrition Center on Aging at Tufts University. So it's no wonder they have the highest concentration of PT too.

That's why Bio PT Elixir has extra doses of both resveratrol and PT – making it the first anti-aging supplement of its kind to carry heaping doses of each.

What you'd get from the berries I've already listed – plus what you'll get from the extra dose we added – will give your body the best possible chance at staying young, healthy, and fit for a long, long time.

**Nutrients backed by nearly 3 decades of research**

Bio PT Elixir puts nearly three decades of science to work in your body – with just one simple, delicious drink.

You'll appreciate how easy it is to make Bio PT Elixir a part of your health routine. Just mix a scoop with water and enjoy just as you would a glass of juice...

... Except it's exploding with antioxidants, vitamins, and minerals to start your day off right.

**But We Only Have a Limited Supply**

Inventory of this cutting-edge formula is going to move fast and you don’t want to miss out on:

- The powerful one-two punch of resveratrol and pterostilbene.
- The heart and cardiovascular support your body needs to stay strong and vital
- A whopping 1700 mg of antioxidant support to protect your cells from damage and keep you looking and feeling youthful
- Immune defenses that will stand at the ready and keep you feeling your best year-round
- Surging natural energy to keep you active, focused, and ready to take on the day, every day
- And both magnesium and potassium that will help your body get the most out of this potent health-boosting formula.

There's simply no good reason not to try BioPT Elixir!
You are just $2.14 a day away from feeling like a new person

Even if you could eat the equivalent of what's packed inside Bio PT Elixir, the separate components would add up quickly. A small container of berries is anywhere from $3 to $6. And that's just one variety. Bio PT Elixir delivers the extracts of ten types of berries in one 6 oz. glass a day.

Then, there's green tea...red wine...pomegranate juice...Not too many pennies-on-the-dollar deals around for those. And the popular acai and goji berries are in a class of their own when it comes to cost and availability.

So when we set out to develop Bio PT Elixir, we didn't just want it to be affordable. We wanted it to be a bargain for what it delivers.

And it is.

Many of my readers tell me they drink a protein fruit shake every morning. Those probably have only a fraction of the antioxidant protection. And they cost about $4-$5 a bottle.

So when I tell these subscribers what they could get in a 6 oz. glass of Bio PT Elixir, they are amazed. It works out to $2.14 every day to look and feel your best with our special formula.

A full bottle of Bio PT Elixir – that’s 28 servings – costs $59.95. That’s a steal when you consider everything that’s jam-packed inside it.

With today’s offer you could have all of the health benefits of Bio PT Elixir for a fraction of what most people spend on a daily morning protein shake!

**Your Best Health Ever... at a 95% Discount??**

In fact, when you add up how much it would cost to equal what you’d get from your daily dose... it comes out to over $50 a day! Not to mention how much you’d have to consume... fruits, juices, supplements... instead of just 6 ounces of Bio PT Elixir... and you can see that it's impossible to beat.

The truth is, the economy is affecting food prices *dramatically*. It’s especially difficult for us – people who are truly concerned about our health and diet.

I know. It’s kind of distasteful to reduce your health and longevity to dollars and cents. But it's true. You pay a premium every time you choose to eat or drink something healthier for you.

Organic milk costs up to three times as much as "regular" milk. Add a scoop of soy protein to anything and the price jumps radically.

But with Bio PT Elixir, it works the other way. Our special formula carries a much higher value than its price tag.

And we want to give you the chance to get in on one of the best deals we’ve ever offered. Plus, your entire purchase is completely covered by our...
100% Risk-Free, 60-Day MONEY-BACK Guarantee

I don't expect you to just take my word for any of this.

I can tell you what we've put into the blend... tell you the benefits of each nutrient... and share how much better it’s made other people feel. But nothing beats the excitement of discovering the difference for yourself.

Bio PT Elixir is so powerful, I’d actually recommend starting slow. I know that sounds crazy. But seriously. Sip half the glass in the morning. Save the other half for later in the day. You might be surprised at what an effect it will have. We have all become so accustomed to the way we feel, that it takes some readjustment to learn how to feel great.

That's why I'm extending this no-strings, no-risk offer to you:

Try Bio PT Elixir risk-free for 60 days. If you don't feel this is the fastest, easiest, most economical way to get all your antioxidant protection in one healthy drink – you'll get your money back (less shipping), with no questions asked.

You won't even be asked to return what you've opened... You keep it and finish the supply!

Secure your supply now before time runs out. You have nothing to risk. Your purchase is protected by our 60-day money-back guarantee.

Feeling young and healthy has never been so easy and affordable

You've read about antioxidants...about berries and red wine and green tea...and maybe once or twice a day even, you think to include some of the latest recommendations into your daily routine.

But let's face it. Getting enough to do you any good is tough. And expensive.
Add Bio PT Elixir to six-ounces of water or juice... and rest assured you're getting your daily dose.

And you're on your way to feeling better than you have in years. All for a price you can afford.

You have nothing to lose – just health-filled years of your life to gain.

To Your Best Health,

Angela Salerno

Your satisfaction is always assured by our rock-solid 60-day money-back guarantee. Choose EZ-Ship with your order today!

"I have actually been using Bio PT Elixir for a couple of years now. The best way to find out how well a product works is stop taking it! This was not done intentionally. Due to much brain fog and paperwork I did not reorder the product even though I meant to.

Lucky for me an email was sent with a special offer and I reordered Bio PT Elixir. I take it every morning without fail. I swear this gets me through a very hectic day of work and the additional hours needed to maintain a home with 2 dogs. I do believe this keeps me going and has a tremendous impact on my health in a positive way. Overall I would say I have excellent health and believe Bio PT Elixir contributes to this.

There is nothing I would change or add to this product." – Margaret B.
